

“Welcome to the Kiwi owned Optometrists
with a real focus on Service”

Laser Surgery

There are a number of factors to consider to decide whether laser vision correction is appropriate for you including your type of correction, occupation, sports and hobbies, age, and outcome expectations.

Visique McClelland Optometrists can coordinate your care with all Laser surgery clinics, providing pre-surgery reports and post-surgery follow-up appointments in conjunction with your surgeon for your convenience. The surgeons will explain all of the risks and benefits associated with the procedure and in many cases provide payment plans and finance options.

Contact Visique to make an appointment to see if your current prescription can be corrected with laser surgery. For more information about Laser Surgery visit the following websites:
